

Structural Engineer

PTS is a consulting firm providing site development services for wireless telecommunications infrastructure headquartered in historic Pioneer Square in Seattle, WA. Our primary clientele to date has been wireless telecommunications carriers such as AT&T, T Mobile, Clearwire, and Sprint. Our core services include: Project Management, Site Acquisition, Land Use Planning/ Permitting, Construction Management, Architectural and Engineering, and Technical solutions.

PTS is seeking a Structural Engineer to join our dynamic team.

Duties Include:

- Analyzing, designing, planning, providing calculations and researching structural components and structural systems for building, steel platform, retaining wall and tower projects.
- Working with reinforced concrete, composite structure, timber, masonry and structural steel designs. Work will take into account technical, economic and environmental concerns. It may also consider aesthetic and social factors. Telecommunications infrastructure projects will be primary with some small building projects outside of telecommunications
- Mentor and manage 3-4 EITs

Desired Qualifications:

- AutoCAD exposure and experience
- Ability to work well with others
- Experience managing a small staff

Requirements:

- Bachelor's degree or Master's degree specializing in Structural Engineering
- PE or SE Registration in the State of Washington
- Strong skills in MS Office suite

Please submit a cover letter and resume for consideration.
